REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the cited prior art fails to disclose or reasonably suggest a device for producing glass gobs having a gas channel embedded in a porous material of a membrane body wherein the channel is larger in cross section than the pores of the porous material and the gas channel does not extend to the outlet surface of the membrane body as recited in claim 1.

Additionally, the cited prior art fails to disclose or reasonably suggest a device for producing glass gobs having a gas channel embedded in a porous material of a membrane body wherein the channel is larger in cross section than the pores of the porous material in combination with the claimed glass introduction device as recited in claim 10.

The closest prior art such as JP 60235739 discloses a porous membrane but fails to disclose or reasonably a gas channel embedded in the porous membrane. US 3,908,735 discloses a channel embedded in a porous material but fails to disclose or reasonably suggest the gas channel not extending to the gas outlet surface. Nor does US 3,908,735 disclose or reasonably suggest a glass introduction device since US 3,908,735 is drawn to the transport of molten steel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
